**DETAILED ACTION**

***Response to Amendment***

1. The declaration under 37 CFR 1.132 filed December 4, 2009 is insufficient to overcome the rejection of claims 4-17 based upon the rejection as set forth in the last Office action because: The declaration does not clearly disclose whether the invention had commercial success because of a long felt need or if the commercial success is do from more from advertising.
2. The following is an examiner's statement of reasons for allowance: The reason for allowance is based on applicant's arguments submitted September 8, 2009. The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof could be found which disclose or suggest the projected portions becoming reversed and are raised toward a surface side of the base when the wig is fitted onto a human skin. The best prior art of record appears to be Finamore US 4,456,019, however, Finamore does not disclose the raised portions becoming reversed and being raised toward a surface side of the base when the wig is fitted onto human skin in combination with the claim features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please amend the abstract as follows, on line 1 please delete - -wig comprises- - and insert - -wig has- -. Further please delete the following beginning on line 11 to line 14, ". Accordingly, light that hits the base is irregularly reflected so that the wig becomes hard to be distinguished from true hair. The implanted hair segments are depressed by the scalp towards the surface side of the base".
